Wrapped Around Breast Cancer 2nd Annual 360° Approach to Detection, Treatment & Care

A daylong conference designed to give health care professionals the latest information on the detection and treatment of breast cancer and an opportunity to earn CEUs and CMEs. The event includes breakout sessions to accommodate healthcare professionals in a variety of areas including medical doctors, nurses, mental health professionals, radiologists, respiratory therapists and massage therapists. Last year's inaugural conference attracted 100 people, and there is capacity for more than 250 this year.
