ILLUSTRATOR INTRO TIO 0400 18 hours \$168.76

This powerful software is the industry standard for graphic designers. Learn how to navigate through Adobe Illustrator and develop the skills necessary to create basic documents and how to draw shapes, select and edit objects and use tools. The course is focused on creating files for print. The class will also learn how to create files of various sizes for different projects, such as magazine spreads, newspaper ads and poster art. Students will also refine basic design skills. This class is instructor led with hands-on learning on a Macintosh. Contact for dates and times

PHOTOSHOP INTRO TIO 0404 18 hours \$168.76

Adobe Photoshop software allows you to manipulate and edit digital images and how to download and scan images. Students will explore the use of color both in RGB and CMYK formats and the various file formats which can be created in Photoshop to be used in other graphic applications like Adobe Illustrator or QuarkXPress. Students will also learn how and why Photoshop is used in both professional print production and for the Internet. This class is instructor led with hands-on learning on a Macintosh. Contact for dates and times

QUARKXPRESS INTRO TIO 0407 18 hours \$168.76

QuarkXPress is the software program to know for anyone who wants to create, manage and deliver content for print and web based forums. Students will learn how to navigate through the QuarkXPress environment and develop the skills necessary to create basic documents. They will also learn how to import and manipulate graphic images. The class will teach the various color systems, what they are used for, as well as how to create and customize colors. This class is instructor led with hands-on learning on a Macintosh.
