

# Looking for a career *on the cutting edge?*

If you like to build, repair, assemble and design things, consider a high-paying career as a machinist, a job in high demand.

Machinists work with metal and other materials. They create, rework and repair machinery, electronic components, autos, aircraft/aerospace and medical devices.

A machinist's average salary in South Florida and nationwide is over \$50,000 a year! Local companies are waiting to hire our graduates.

Get your hands-on training at PBCC in a technologically advanced, Computer Numerically Controlled (CNC)-equipped machine shop in just over a year.
